

Carbon Black Dispersions for Asphalt Sealers

ChromaPave® markets a variety of carbon black dispersions for asphalt sealing applications. Water-based carbon black dispersions are used for both large and small recoating projects, and these products are more environmentally friendly than solvent-based products.

We also offer a line of colored dispersions for asphalt sealer and hotmix applications!

For more information or to obtain a quote, contact us through our office or on the web at www.chromapave.com.
